Stainless steel and brass parts made to your drawing or sample

P-JOINT is the contact point for a China-based manufacturer (JADE, Qingdao and other sites). We make fittings, machined parts and cast parts to your drawings or samples (build-to-print only). **No minimum order quantity.** We reply by email in English.

What we make

- Processes: CNC turning, milling and drilling; investment casting; stamping, bending, welding, cutting, heat treatment
- Materials: stainless steel (SUS304, SUS316 and others), brass, ceramic, resin (food-grade PP, POM, ABS)
- Finishes: nickel and chrome plating, buffing, electropolishing, PVD in a specified colour, painting in a specified colour
- Capacity: 400+ CNC machines, 8 sites, about 150 staff

Quality

- Thread gauge, leak and burr checks on 100% of parts, plus a random re-check before packing
- Defects are replaced free of charge
- 17 years in this field, with 100% of products exported to customers overseas

Lead time, price and terms

- Samples (charged): about 3 weeks to make, plus international courier time
- Mass production: about 30 days, excluding tooling
- No minimum order quantity (small quantities affect the unit price; we quote per item)
- Quotations are the factory's own prices; we add no separate fee on top. Prices include international freight, customs clearance, duties and import taxes, delivered with no further charges
- Payment, customs and other trade formalities are handled through our established trade solution. Payment terms are given in the quotation

How to order

1. Email a drawing (PDF, STEP, DXF) or a sample, with material, quantity and destination
2. Quotation with price and lead time
3. Order
4. Production, inspection and delivery

Every order is build-to-print. We do not sell stock items and cannot accept orders without a drawing or sample. Your drawings are kept confidential. Visits to the head office and factories are welcome.
